

Managed Backup

Managed Backup Workflow

Our automated backup, replication and recovery offering provides secure, reliable, efficient protection of your organization's critical data, directly through a secured internet connection. You get a data protection solution that lets you safeguard your data without additional capital or IT expenses. We automatically back up your data, you configure your desired retention schedule and monitor your backups via a web browser. All backed up data is written to LTO 4 or 5 tape cartridges and securely shipped to you as a value add, all at your fingertips whenever you need it—with multiple options for fast, foolproof recovery.

Multiple options for data recovery

- Lose your files and folders? Point and click to recover over the Internet
- Compression technology and bandwidth throttling maximize backup transfer speed and reduce impact on productivity.
- Need to copy tapes? We'll ship you an LTO 4 autoloader or ship us your tapes for multiple copies and we will be glad to help

Key Benefits

- Easy, automatic data protection
- Secure and reliable
- No capital expense or IT staff
- Assured disaster recovery
- Centralized management
- Easy regulatory compliance
- Broad platform support
- Expert help 24/7
- Backup Media Copy

Choose Phantom Data Systems for a secure, reliable, and efficient solution for protecting your company's critical data—without additional capital or IT investment.
